DISCLOSURE OF PRIOR ART

Included herewith is a ten page Information Disclosure Statement, using Substitutes for form 1449A/PTO, along with best full or partial copies of the listed reference disclosures. It is requested that the listed reference disclosures be considered by the Examiner (PTO) and made of Record as having been considered. Depending upon the particular claims, certainly not all of the listed disclosures are "prior art" to the present invention, as the instant Application is filed in a chain of co-pendency with priority claims under 35 USC 120 dating back to at least March 5, 1992.

RELEVANCY OF THE PRIOR ART

Next to each listing of the reference disclosures on the Information Disclosure Statement forms is the statement "generally all", and in some cases "sheets" is added thereto. "Generally all" in this case means the reference disclosure is relevant and should be reviewed at least because it discusses one or more electrical devices and is therefore at least somewhat relevant to the present invention. However, none of the reference disclosures alone anticipate the present invention, and no proper combination of any of the listed reference disclosures suggests the present invention.

I also wish the issues pertaining to Double Patenting be considered, as I have many additional pending U.S. patent applications and issued U.S. Patents. Therefore, the PTO is requested to please search for other applications under my name, Brad A. Armstrong, in U.S. patent applications and patents, and to consider the issue of Double Patenting.

Thank you for your consideration and assistance.

Very Respectfully;

 Date: 7-15-02
Brad A. Armstrong, Inventor
